

BRAND KIT

Imperial College Robotics Society

ICRS

GOALS :

1. RETAIN FUN -- work with the creativity of the lab and society as a whole
2. DISPLAY AND SHARE -- accurately broadcast events and projects
3. BE ADAPTABLE -- fit all events, projects and alerts
4. INTEGRATE SUB-BRANDS -- merge well with IPRL, SSL and their logos, colours and theming
5. MAKE ICRS RECOGNISABLE -- increase visibility and awareness even to non-members
6. WORK WITH EXISTING BRANDING -- fit around colours and logo used in ICRS currently
7. BE EASY TO WORK WITH -- necessary ability to launch publicity with short notice
8. APPEAL TO NEW MEMBERS -- be attractive for 2025 freshers and other joining members

HIGH CONTRAST Text, Backgrounds, Graphics	#000000	PURE BLACK

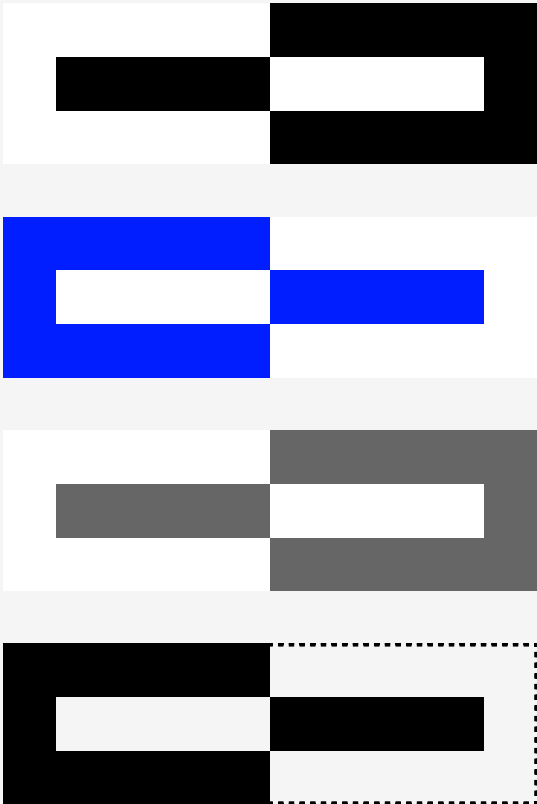

COLOURS

ADDED To better increase contrast and add to colour profile. This colour is strong but does not steer too far away from the existing branding, it also provides better contrast for white and light coloured elements and ties in well with IMPERIAL's broader branding guidelines.	#001EEF	DARK BLUE
RETAINED From the current ICRS colour profile. This colour lacks the contrast necessary for higher accessibility and readability standards, but is important to retain as it is an important part of the society's existing branding and image.	#0084FF	LIGHT BLUE
ADDED To broaden colour palette and increase utility. This colour is able to cut through the current blue + monotone colours in order to increase the diversity of colour available. A bright yellow was chosen for the primary purpose of enhancing the society's alerts visually.	#F2FF00	ALERT

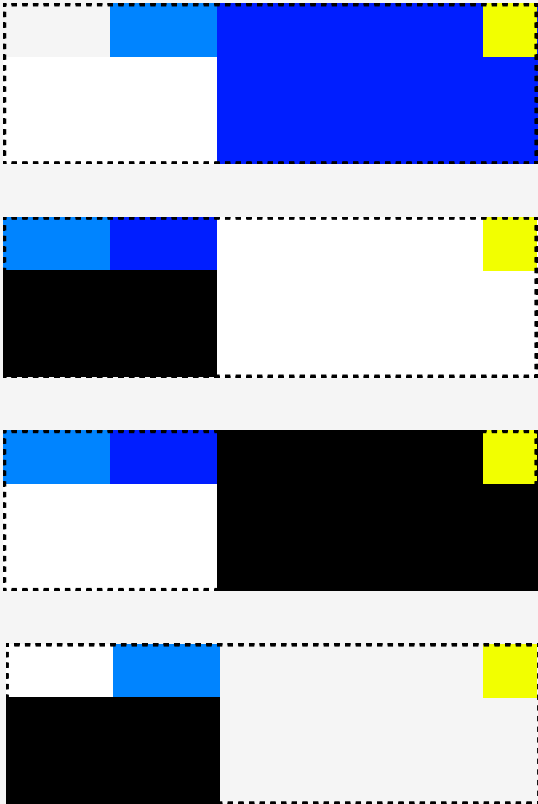

COLOUR

CONTRAST

RATIO

CONTRAST

Contrast is very important for modifying the clarity of text and logos. Not all combinations within the colour palette will have enough contrast for text and small elements

The graphic showcases [almost] all of the combinations that meet the contrast standards for displaying text.

RATIO

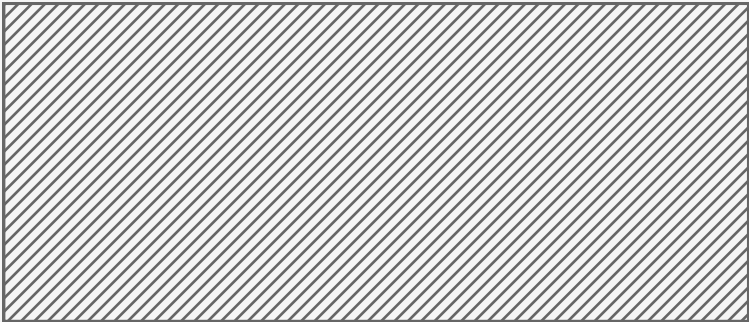

The ratio of colours in the palette helps to maintain the theming and 'clean-ness' of any piece of design.

This graphic shows groups of 4* colours, with the 2 largest areas representing background and text.

*ALERT colour is also featured in all groups, though it may not need to be used.

TYPE

Main Typeface

Geist Mono Regular

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789!"#\$%&'()*+,-./:;?@[\\]_{}

DEFAULT

Monospace style font with a modern aesthetic that is both visually interesting and readable. Can be used for titles, body text and graphical elements.

Default weight is REGULAR, although SEMIBOLD and LIGHT are also appropriate for more graphical elements.

SEMIBOLD

LIGHT

Secondary Typeface

Geist Medium

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789!"#\$%&'()*+,-./:;?@[\\]_{}

PROFESSIONAL

A swiss style sans-serif font that is clean and very easy to read. Geist can be used for more professional settings where GEIST MONO may not be appropriate.
Like the mono variant, GEIST is also available for free on google fonts and comes with 8 preset weights. MEDUIM has been selected as the default.

Tertiary Typeface

London Underground
Regular

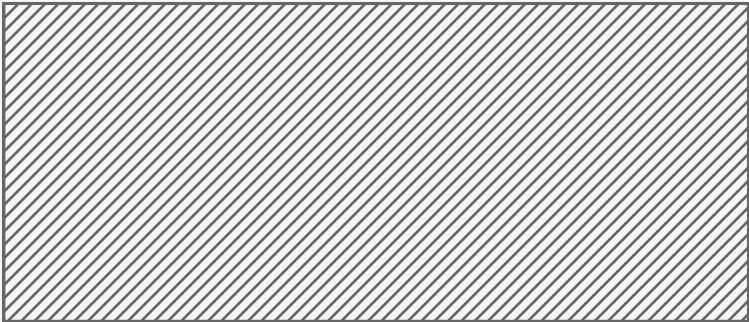

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789&*+-

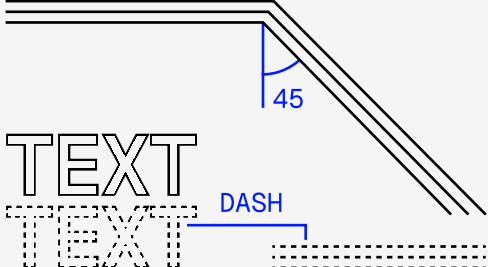

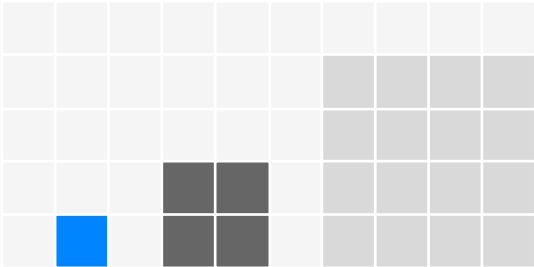

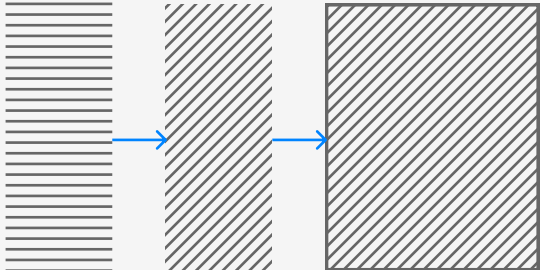

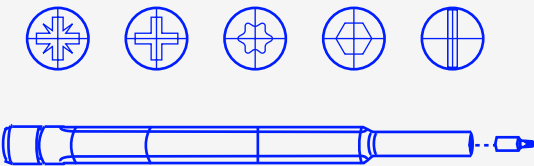

DISPLAY

A dot matrix typeface based on the London Underground display screens. This font can be used for graphics and visual elements to contrast with the more standard GEIST and GEIST MONO.
LONDON UNDERGROUND REGULAR has a more limited character set and works best in AA casing.

DESCRIPTION

[END]

Thank you for reaching the end!

Hopefully you enjoyed, I would love to hear feedback if you didn't, and maybe this (or something pretty close it) can work well for ICRS.
