

Personal Statement

Second-year Design Engineering student at Imperial College London with a strong foundation in human-centred design, prototyping, and technical problem-solving. Experienced in taking projects from research and concept generation through to presentation and communication. Skilled in UI/UX design, visual storytelling, and collaborative teamwork. Looking for a summer internship in design or engineering to apply creative and analytical design skills in a professional environment.

Education

Imperial College London

MEng Design Engineering | 2024 - Present

- Completed first year of multidisciplinary course combining engineering and design
- Achieved Design Engineering Selected Innovation REcognition (DESIRE) award for 'Busk Radio' Human Centred Design Engineering project.

Newman College

A-Levels | Completed 2024

A* Mathematics | A* Design & Technology | A Further Mathematics | A Physics

Experience

Publicity Officer and Social Media Manager

Imperial College Robotics Society

September 2025 - Present

- Created digital and print content for social media, events, and internal communications, ensuring consistent and recognisable design language
- Designed templates and content in Figma and Adobe Creative Suite for social and promotional use
- Increased engagement across channels, growing membership by 500+ in the first month and Instagram following by 350+ with over 125k post views
- Worked closely with committee members to plan campaigns and maintain an inclusive, visually coherent brand presence

Lifeguard & Swimming Teacher (Part-Time)

Prince Regent Leisure Centre, Brighton

June 2022 - June 2024

- Delivered beginner and intermediate swimming lessons for children and young people
- Developed teamwork, communication, and reliability through consistent part-time work alongside studies

Work Experience - Structural Engineering Firm

Jensen Hunt Design, London

1 Week (July 2023) and 3 Weeks (July - August 2024)

- Shadowed engineers through all stages of the design process, from concept development to on-site review
- Gained hands-on exposure to CAD drawings, project documentation, and technical problem-solving in a professional context
- Observed team collaboration between designers, engineers, and clients to understand how design intent is translated into built outcomes
- Assisted with basic drafting, documentation, and office tasks while learning workflow management and communication

Projects

Busk Radio (University Design Project - Brief 'Urban Play')

Role: User Research and UI Designer

- Collaborated with a multidisciplinary team to develop a device, app, and platform for live streaming and audience donations for buskers
- Conducted extensive user research, including interviews and observation with buskers and audience members, to identify pain points and opportunities
- Designed wireframes and interface layouts in Figma, based on research into intuitive usability
- Used Figma's prototyping and developer tools to translate prototypes into a finalised iOS app
- Presented final concept and prototype to staff and peers, achieving DESIRE Award for Excellence and an A* grade

Projects

Portfolio Website: noahhh.com

Role: *Designer and Front-End Development*

- Design and development of a personal portfolio website from scratch to showcase design and photography work
- Self-taught in HTML, CSS, React, and Tailwind to build a responsive, component-based interface
- Created three interchangeable homepage modes (“Default”, “Work”, and “Personal”) to reflect different user contexts and browsing behaviours
- Focused on layout and interaction design, developing custom hover animations and transitions using GSAP for a playful and engaging experience
- Iteratively prototyping visual and motion elements in Figma with an emphasis on accessibility, usability, and expressive design

Imperial College Robotics Society Rebrand

Role: *Solo Logo, Graphic, and Branding Design*

- Worked with society committee to establish new visual identity goals and brand direction
- Designed new logos, colour schemes, and typography for use across social media and printed materials
- Created a comprehensive brand kit outlining design rationale and implementation guidelines
- Presented design outcomes to the committee and adapted visuals based on collective feedback

Key Skills

- User Interface and User Experience Design
- User Research, Testing, and Iterative Prototyping
- Visual Communication and Information Hierarchy
- Branding, Typography, and Layout Design
- Figma, Adobe Creative Suite (Illustrator, InDesign)
- Front-End Development: React, Tailwind CSS, GSAP
- 3D Modelling and Prototyping (Fusion 360)
